

## A Level in Biology

Location	Altrincham Campus
Course Type	College 16-18
Department	A Levels
Start Date	Monday 2nd September 2024
Course Code	AFQ-AL3L-1101

## Course Overview

---

A Level Biology is an exciting subject where over two years you will learn about the natural world and all the living things within it. Throughout your biology studies, you will gain a wide range of skills including investigation, analysing information, and general scientific skills. Studying Biology to A Level will build not only your knowledge of the biological world but also wider workplace skills of observation, research, teamwork, and communication.

Students follow the OCR A Level Biology A specification.

## Course Requirements

---

PLEASE NOTE - YOU MUST APPLY FOR 3 A LEVELS

Standard A Level entry requirements: 5 x GCSE grade 5's or above (must include Maths and English Language). However, certain subjects may have additional entry criteria, which can be found below:

Additional Entry Requirements:

A Level Biology will require grade 6 in GCSE Biology or 66 in Combined Science.

This subject must also be studied alongside at least one other science-based (Maths, Biology, Chemistry, Physics) course. Psychology can be counted as an additional science in this case.

## What You Will Learn

---

Biology is an essential subject for many careers in health and caring it develops problem solving and analytical skills and has a mandatory practical assessment

## Assessment

---

3 papers are taken at the end of the two-year course:

Paper 1: Biological processes (37% of total A Level)

Paper 2: Biological diversity (37% of total A Level)

Paper 3: Unified Biology (26% of total A Level)

There is a special practical grade awarded on the basis of the practical reports completed over the two-year programme.

## Progression

---

An A Level in Biology opens a vast range of further study and career opportunities, many of which can take you all around the world. Biology is a pre-requisite subject for many Biological Science and Medical related degree study areas though students can also use this A level for many other diverse courses and apprenticeships from education to engineering.

Biology though essential for many medical careers is also a facilitating subject for many future options including energy and the environment, animals and agriculture and, scientific, pharmaceutical and medical research.

## Career Options

---

A Level Biology will prepare you for further study and careers in a variety of disciplines, from medicine, physiotherapy, and biochemistry to nursing, food science, and zoology.

## Mandatory Units

---

In the first year you will study cells, biochemistry, gas exchange and transport in both plants and animals. You will also study the environment, how variation aids species to survive and look at the work of Darwin.

In the second year you will build and expand your knowledge of photosynthesis and respiration, energy transfer, homeostasis, genetics and gene technology.
