HNC in Mechanical Engineering for England (HTQ)

Location	Stockport College
Course Type	University Level
Department	Engineering
Start Date	Monday 20th January 2025
Duration	Part-time, 1 Year
Time	09:00 - 17:00
Fee	£ 4000.00
Course Code	SFP-HM4H-1101

Course Overview

Embark on a dynamic journey into the world of Mechanical Engineering on this HNC course, designed to equip you with the essential knowledge and practical skills required for a successful career in this field.

Our dedicated faculty, comprised of experienced professionals, will guide you through the latest industry trends, technological advancements, and sustainable practices. You will also develop essential skills in problem-solving, project management, and teamwork, all of which are highly valued by employers in the field.

Upon successful completion of the HNC program, you will have the option to progress to an HND or enter the workforce with the confidence and competence to contribute effectively to the engineering industry.

Course Requirements

All applications will be considered on individual merit. However, offers will usually be based on:

1. BTEC Level 3 qualification in Engineering
2. GCE Advanced Level profile that demonstrates strong performance in a relevant subject or adequate performance in more than one GCE subject.
3. GCSE grades at A* to C (or equivalent) and/or 9 to 4 (or equivalent) in subjects such as Mathematics and English
4. Other related Level 3 qualifications
5. Access to Higher Education Diploma from an approved further education institution
6. Relevant work experience, or an international equivalent to the above qualifications

What You Will Learn

You will delve deep into the core principles of engineering, including specialisms such as thermodynamics, production engineering and mechanics. Hands-on laboratory sessions, workshops, and industry-relevant projects will enhance your practical expertise, allowing you to apply theoretical concepts to real-world scenarios. Successful completion of the course will enable you to perform key mechanical engineering tasks in the sector, understand processes and operations, and work effectively.

Assessment

Coursework and Assignments: Coursework and assignments are common assessment tools. Students are given specific projects or tasks related to their coursework, and they are evaluated on their ability to apply theoretical knowledge to practical problems.

Practical Work: Practical laboratory sessions are a crucial part of an electrical engineering program. Students may be assessed on their ability to conduct experiments, analyse data, and draw conclusions from their findings.

Reports and Technical Writing: Students may be required to write technical reports based on their laboratory work or projects. These reports assess their ability to communicate technical information effectively.

Presentations: Students may be asked to give presentations on engineering topics, projects, or case studies. This assesses their communication and presentation skills, as well as their understanding of the subject matter.

Progression

On successful completion you may progress to a HND at Level 5 and then to a top-up Level 6 on a related undergraduate programme such as:

BEng (Hons) Mechanical Engineering
BEng (Hons) Mechanical Engineering and Management
BEng (Hons) Mechanical and Production Engineering
BEng (Hons) Mechanical and Manufacturing Engineering
BSc (Hons) Mechanical Engineering
BSc (Hons) Mechanical Engineering (Automation)

Career Options

This HNC opens a wide array of rewarding career options in various sectors. Graduates of this program are equipped with a strong foundation in mechanical engineering principles and practical skills, making them valuable assets to industries that rely on innovation, design, and problem-solving. Here are some promising career paths:

Engineering Technician
Mechanical Engineering Technician
Engineering Manufacturing Technician
Technician (Mechanical)
Technician Mechanics

Mandatory Units

At Level 4 you will study the following units:

Engineering Design
Engineering Maths
Managing a Professional Engineering Project
Mechanical Principles
Fluid Mechanics
Fundamentals of Thermodynamics and Heat Engines
Production Engineering for Manufacture
Quality and Process Improvement

Extra Costs Involved

No

Exam Validation Body

Pearson Education Ltd.

Exam Validation Body

Pearson Education Ltd.

Hours Per Week

6 hours for part-time course or 12 hours for full-time course.

How Long To Complete

Two years part-time with one full day attendance per week, or one year full-time with the equivalent of two full day attendance per week.

Programme Structure

Each unit is worth 15 credits and over the course of the programme you will gain 120 credits.
